The Honorable Alex M. Azar II Secretary U.S. Department of Health & Human Services Hubert H. Humphrey Building, Room 509F 200 Independence Avenue, SW Washington, DC 20201

Dear Secretary Azar:

The undersigned organizations represent the hundreds of thousands of physicians who treat our nation's Medicare patients every day. We are committed to working with the Administration on efforts to improve the program. We want to highlight our concerns, however, with a provision in the October 3, 2019 Executive Order entitled, "Protecting and Improving Medicare for our Nation's Seniors."

We are concerned with the broad yet vague language in section 5, particularly the language related to the supervision and reimbursement of nonphysician professionals. We are highly concerned this language requires the Secretary of Health and Human Services to propose a regulation to eliminate or weaken current Medicare supervision requirements of nonphysician professionals, a critical safeguard to ensure the health and safety of Medicare patients and the cornerstone of the widely adopted team-based approach to health care. Scope of practice of health care professionals should be based on standardized, adequate training and demonstrated competence in patient care, not politics. While all health care professionals share an important role in providing care to patients, their skillset is not interchangeable with that of a fully trained physician.

The undersigned organizations have long supported physician-led health care teams, with each member drawing on their specific strengths, working together, and sharing decisions and information for the benefit of the patient. Just as teams do in business, government, sports, and schools, health care teams require leadership. With seven or more years of postgraduate education and more than 10,000 hours of clinical experience, physicians are uniquely qualified to lead the health care team. Team-based care has a proven track record of success in improving the quality of patient care, reducing costs, and allowing all health care professionals to spend more time with their patients. Before imposing broad stroke changes to Medicare's supervision requirements and reimbursement policies, the undersigned organizations encourage the Administration to carefully review and consider fact-based resources, including a thorough review of the vast differences in education and training of nonphysician health care professionals and the impact on the overall cost of care.

We are also concerned with language in section 5 that would require the Secretary of the Department of Health and Human Services to propose a regulation that would affect the reimbursement of physicians and nonphysicians established under the Social Security Act.

Honorable Alex M. Azar II October 29, 2019 Page 2

We consider such a proposal to require a change to the underlying statute and urge the Administration to refrain from pursuing this proposal.

Sincerely,
